

Erosion Control Grader Workshops Pilbara, March 21 & 23

Yalleen Station Wed 21 March 2012

Yarrie Station Fri 23 March 2012

10am - 4pm (Lunch supplied)

Learn how to:

- ▶ Reduce maintenance time for access tracks by 30-50%
- ▶ Save valuable travelling time on access tracks
- ▶ Have more effective fire breaks
- ▶ Reduce fence repairs & improve stock handling through effective fence line erosion control
- ▶ Limit soil & silt flowing into stock waters & watercourses
- ▶ Create a safer working environment

Key Presenter: Darryl Hill, Soil Save

Darryl Hill is highly recognised throughout Australia for his practical knowledge and experience using graders and other earth-moving machinery.

For more than 40 years he has studied soil erosion from a variety of viewpoints; as a ringer, head stockman, property manager and landcare officer.

In addition to managing his own block near Katherine Darryl now travels widely, running grader workshops and consulting on fence line and road construction and maintenance.

What others have said:

- “ Very relevant and helpful information ”
- “ Very well presented, easy to understand ”
- “ Excellent ”

Please RSVP for catering:

Mel McDonald, Landcare Facilitator
