

GM Technology— The Future in Agriculture

A Free Public Event

Hosted by the Pastoralists & Graziers Association of WA (PGA)

Tattersall Lecture Theatre, University of WA

Monday 7 October 2013—6pm start

This public GM Forum is an opportunity for city based consumers and decision-makers to further their understanding of this beneficial technology.

Come and join farmers, agronomists, scientists and consumers to hear how future advances in GM technology are set to revolutionise grain growing in WA and benefit our farmers.

You will hear from Australia's leading experts in GM technology, including scientists, agronomists and farmers on why they support this safe, affordable and effective technology.

The Forum—chaired by Prof. Alan Robson, past Vice Chancellor of UWA—will present the facts on GM technology, with contributions from the following respected scientists and speakers: Prof. Lyn Beazley, Prof. Jim Peacock, Dr John Manners, Dr Bryan Whan, Mr John Snooke, Mr Bill Crabtree.

RSVP by **1 October** as seats are limited. Phone Sonya at the PGA **9479 4599** or email **sonyas@pgaofwa.org.au**
