FIELD WALK

Investigating Local Research Technologies

Friday 29 June 2012

Free event: Bus, morning tea & lunch provided

Meeting at "Sandown" sheds, Marchagee Track, Badgingarra

Bus departure: **9.30am sharp to Rose Hill, Eneabba**

Morning at Judeen and Rose Hill - Nick Ashby

Evaluating the effectiveness of incorporating clay by spading

Gully erosion prevention strategies, plant selection and paddock design

NVT trials

Afternoon at Sandown - Colin Mc Alpine

Two trials: small plot trial seeded to lupins and a larger plot seeded on to wheat with different treatments including knife points, winged points, paired-row winged seeding boots and banded wetting agents (Irrigator)

Trial on different methods for managing water repellence: claying, mould-board claying, rotary spading, one-way ploughing and offset discs

- ***McIntosh seeding bar demonstration***
- ***Liquid nitrogen demonstration using Flexi N***
- ***DAFWA Red legged earth mite trial***
- ***Sakura demonstration***

Free drinks & nibbles provided after field walk

RSVP Essential by 26 June 2012
