## **Topic: Health and Safety Risk Assessment & Legislative Requirements**

- **Do you** have employees (including family), use contractors, casual or seasonal labour?
- **How would you** cope if a family member or one of your workers was to be involved in a significant accident on your property or your business premises?
- **If Worksafe needed to investigate an accident, would you** be able to provide to the evidence required to show that you had, as far as practicable, assessed the risk, consulted and trained the workforce and put the necessary controls in place to have avoided the accident?

This practical 2 hour OSH Awareness Session is designed to help employers and organisations understand their Duty of Care and how to take Reasonable Steps to prevent accidents in the workplace through the implementation of the following legislative requirements

**Consultation with workers**  
**Risk Assessment**  
**Hazard Identification**  
**Risk Control**

**Induction & Training**  
**Supervision**  
**Monitoring & Recording**  
**Injury & Illness reporting - and more**

Learn how Prompt Safety Solutions tailor Risk Assessment and Training tools to meet OSH Legislative Requirements that are practical and easy to implement for your individual business circumstances and budget.
